

Concerning the "re-farming" or reallocation of the subbands that is pending, I would request you consider the comments filed by Donald B. Chester. I am in agreement with his approach and solutions.

Currently the allocation for the wideband modes are insufficient, particularly on the 75/80 meter band of Amateur allocations. I respectfully request the commission re-allocate more space to the wider band modes per Mr. Chester's suggestion.

Sincerely,

James P. Wilhite
